

Beryllium Copper and Stainless Steel Contact Finger Strips

With a selection of more than 200 different types of finger strips in our range, we can supply Beryllium Copper and Stainless Steel finger strips for almost any application.

Alternatively, we can supply configurations specifically to your design. We offer a complete service from design and prototype to full production batches.

We also provide a complete range of other EMC and RF shielding products including

- Circuit-board shielding
- Shielded glass and acrylic windows
- Attenuation vents and filters
- Low-closing-force gasketing
- Knitted-mesh and elastomeric gasketing

Please contact us to discuss your requirements.
